# KITE Client – Whitelist Settings

During testing, KITE Client passes information to the servers at the Center for Educational Testing and Evaluation (CETE). If your location uses a firewall, be sure to whitelist the following domains so that KITE Client will function correctly.

## Whitelist

\*.cete.us

kite\*.s3.amazonaws.com

## Files that Need Access Through the Firewall

In addition, consider allowing the following files access through the firewall:

kiteclientae.exe

kiteclient.exe

tde.exe
