# KITE Client – Whitelist Settings

During testing, KITE Client passes information to the servers at the Center for Educational Testing and Evaluation (CETE). If your location uses a firewall, be sure to whitelist the following domain or IP addresses so that KITE Client will function correctly.

## Whitelist

Domain	OR	IP Addresses
*.cete.us		66.206.205.32/27
*.s3.amazonaws.com		103.21.244.0/22
		103.22.200.0/22
		103.31.4.0/22
		104.16.0.0/12
		108.162.192.0/18
		129.237.18.64/27
		141.101.64.0/18
		162.158.0.0/15
		173.245.48.0/20
		188.114.96.0/20
		190.93.240.0/20
		197.234.240.0/22
		198.41.128.0/17
		199.27.128.0/21

## Files that Need Access Through the Firewall

In addition, consider allowing the following files access through the firewall:

```
kiteclientae.exe  
kiteclient.exe  
tde.exe
```
